THE MAIN LINE AIRWAY—COAST TO COAST

FINEST MEALS ALOFT!

THERE is a *reason* why mealtime is one of the highlights of your Mainliner trips. Those tempting, satisfying menus are planned especially for *you*.

United is the only airline maintaining its own staff of Swiss chefs and an exclusive chain of commissaries, flight kitchens and experimental kitchens from coast to coast.

In these kitchens our chefs prepare breakfasts, luncheons, dinners and between meal snacks—over 4,900,000 meals a year! Menus are carefully planned to assure coast to coast travelers a variety of Mainliner meals.

When you fly United, you enjoy the finest service aloft.

UNITED'S *Four Engined* MAINLINERS

THE Age of Flight is here — and with it comes United Air Lines' fleet of four-engined Mainliners.

Currently making its appearance in ever increasing numbers is the Mainliner 230 . . . the four-engined sky giant pictured at right. It cruises at 230 miles an hour carrying 44 passengers and cargo. While other planes of this type carry up to 56 passengers, United Mainliner 230's are restricted to 44 seats to assure the utmost in passenger comfort.

In September, the Mainliner 230 will be followed by an even larger, faster, more luxurious four-engined transport — the "altitude conditioned" Mainliner 300. This huge plane will offer air travel comforts and speeds without parallel. It will cruise in the smooth upper altitudes at 300 miles an hour carrying 54 passengers and nearly 3 tons of cargo across the nation in less than 9½ hours. Travel time from Chicago to New York will be slashed to 2 hours and 40 minutes.

As a day plane, the Mainliner 300 will offer reclining lounge chair comfort to its 54 passengers. Two stewardesses will serve tempting Mainliner meals and attend your every wish.

Converted to a sleeper plane (just a matter of minutes) it will present 24 invitingly soft, roomy berths . . . you'll sleep the miles away in perfect comfort — 300 miles every hour.

When you travel — fly United — Route of the Four-Engined Mainliners.
